

UV镜片 (UV Mirror)

UV Mirror filter has reflection that is greater than 85% from 220 nm to 250 nm. This unmounted UV mirror filter is coated on a 1.04 mm thick fused silica substrate and is 25.4 mm in diameter. Alluxa mirror filters deliver superior performance and durability over traditional laminated filters. All Alluxa optical filters are hard-coated using our innovative SIRRUS™ plasma deposition process. Contact us for custom sizing.

UV镜面滤光片在220nm到250nm之间的反射强度高于85%。这种未安装的UV镜滤光片涂在1.04mm厚的熔融石英衬底上，直径为25.4mm。Alluxa镜面滤光片比传统的叠层滤光片具有优越的性能和耐用性。所有Alluxa光学滤光片都采用我们创新的SIRRUS™等离子沉积工艺进行硬涂层处理。定制尺寸请联系我们。

滤光片型号 (Model)	入射角度(°) Angle of Incidence	直径尺寸(mm) Dimensions	滤光片厚度(mm) Filter Thickness	材质 (Substrate Type)	装配类型 (Assembly Type)	价格
UV Mirror	45	23.5	1.04	熔融石英 (Fused Silica)	Unmounted	¥3,792.00
