

超陡长通滤波片 (ULTRA STEEP LONGPASS FILTERS)

The deep blocking, tight wavelength control, steep edges, and wide-range transmission of ULTRA Series notch filters allow for precision blocking of lasers or other light sources, without sacrificing the quality of target signals. Each ULTRA Series optical notch filter is designed and rigorously tested to exceed the most advanced system requirements.

超陡长通滤波片阻挡较短波，同时传送较长波。Alluxa超陡长通滤波片提供优于传统层压滤波片的性能和耐久性。Alluxa光学滤光片使用我们创新的SIRRUS™等离子沉积工艺进行涂层。

滤光片型号 (Model)	入射角度(°) Angle of Incidence	中心波长(nm) Center Wavelength	半峰宽(nm) FWHM	屏蔽等级 Blocking Level	直径尺寸(mm) Dimensions	滤光片厚度(mm) Filter Thickness	材质 (Substrate Type)	装配类型 (Assembly Type)	价格
224 OD5 Ultra Steep Longpass Filter	0	228	228	OD5:206-226 nm	25.4	2.00	熔融石英 (Fused Silica)	Unmounted	¥17,616.00
